## BIOGAS

Renewable energy, a constantly developing sector that requires compressors for the pumping of biogas and natural gas with proven performance. A need that VMC responds to with a range of suction valves, minimum pressure valves, and ad hoc developed integrated systems which, thanks to the high quality of the materials and treatments used, guarantee efficiency, safety, and reliability over time, in contact with any gaseous mixture, even in particularly aggressive environments.

### INTAKE VALVE (NRPG)

- RH 38
- RH 60

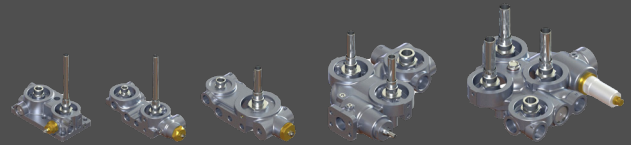

- RBC 90
- RBC 120
- RBC 160

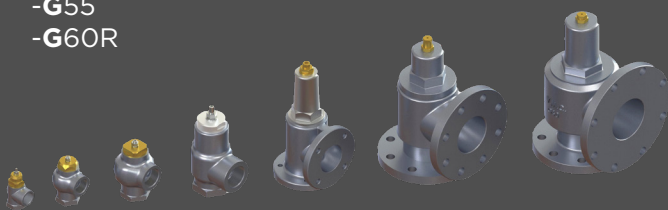

### COMBINATION BLOCK

- VTDM29
- VTDM39
- VTD2M45
- VTD3M50

### MINIMUM PRESSURE VALVES

- G10
- G26
- G36
- G46
- G55
- G60R

### AIR END UP TO 13 BAR
